

PAPER CRAFT AI

An ML Paper Recommendation System

**For People who love
researching and reading**

Vishnu Priya Thanda
Under the guidance of: Dr. Chaojie
(Jay) Wang
UMBC

Outline

1. Background
2. Data Collection
3. EDA
4. Implementation
5. Embedding Models
6. Demo
7. Conclusion

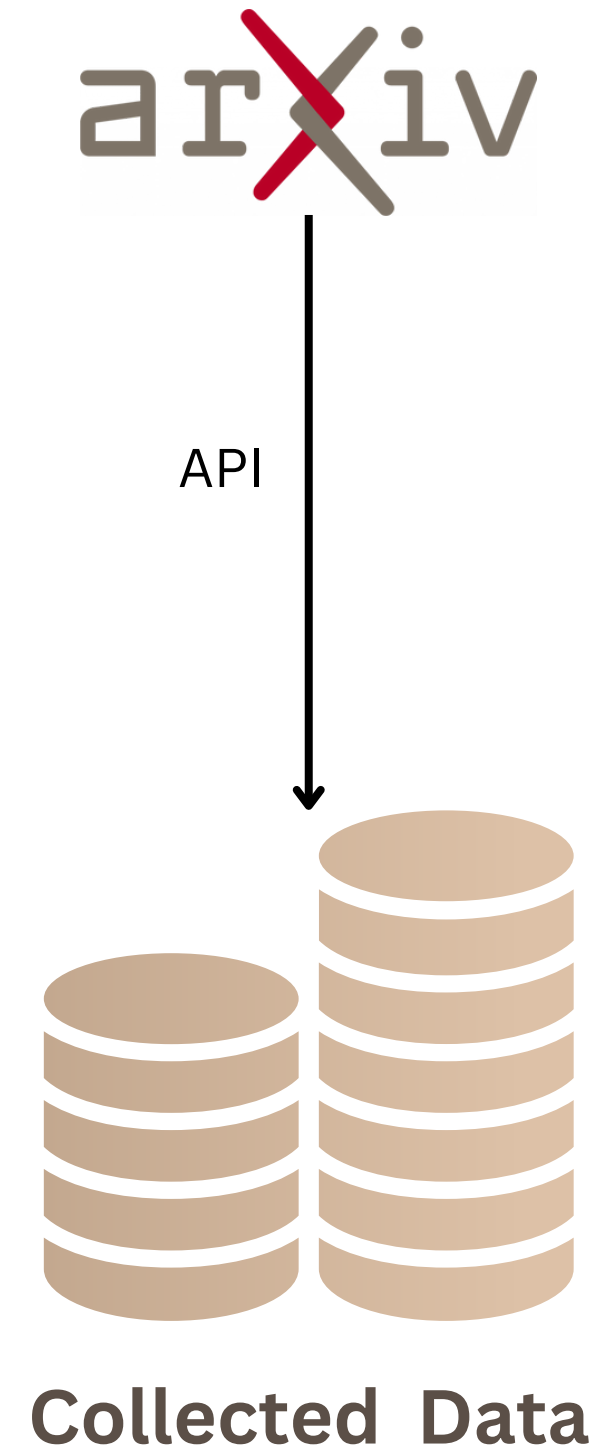

Number of AI Publications (in thousands)

Source: <https://aiindex.stanford.edu/ai-index-report-2022/>

Data Collection

- Extracted data from arXiv API
- 9500 Machine Learning Papers
- Each paper has data about summary, title, authors and link to the paper.

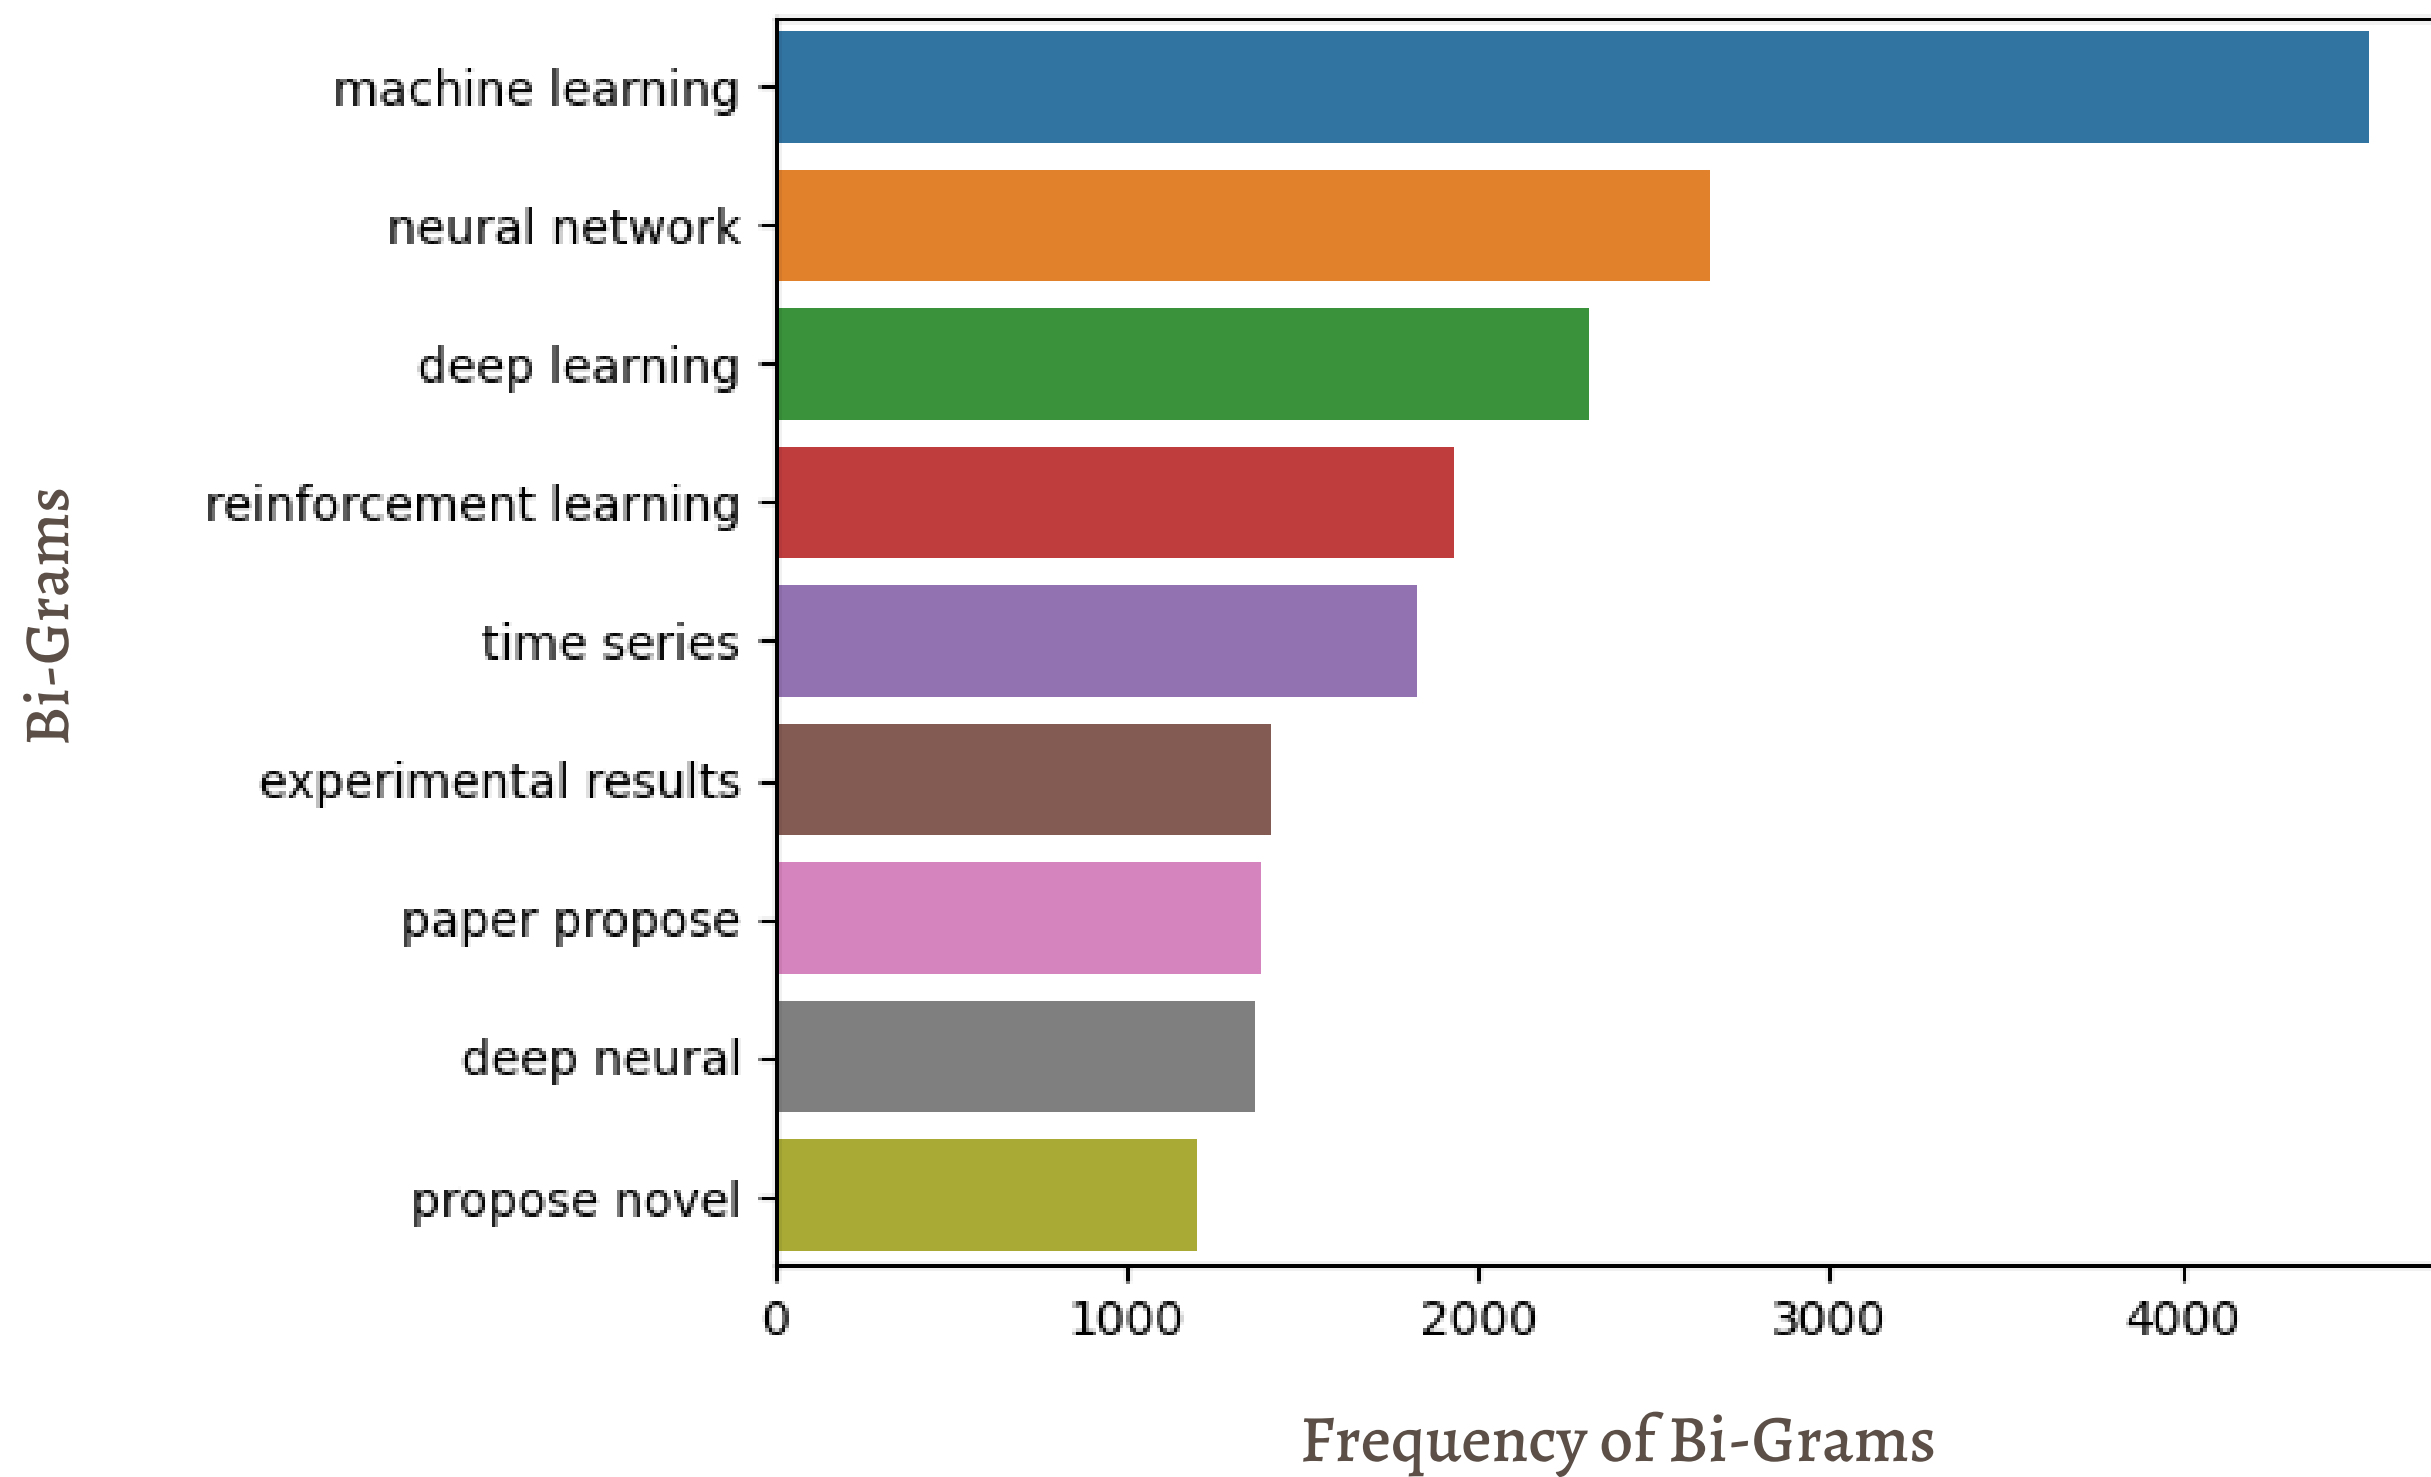

Sample Data

Id	Title	Summary	Authors	Published	Link
1	A Market-Oriented Programming Environment and	Market price systems constitute a well-under...	M. P. Wellman	2022-08-08	http://arxiv.org/abs/cs/9308102v

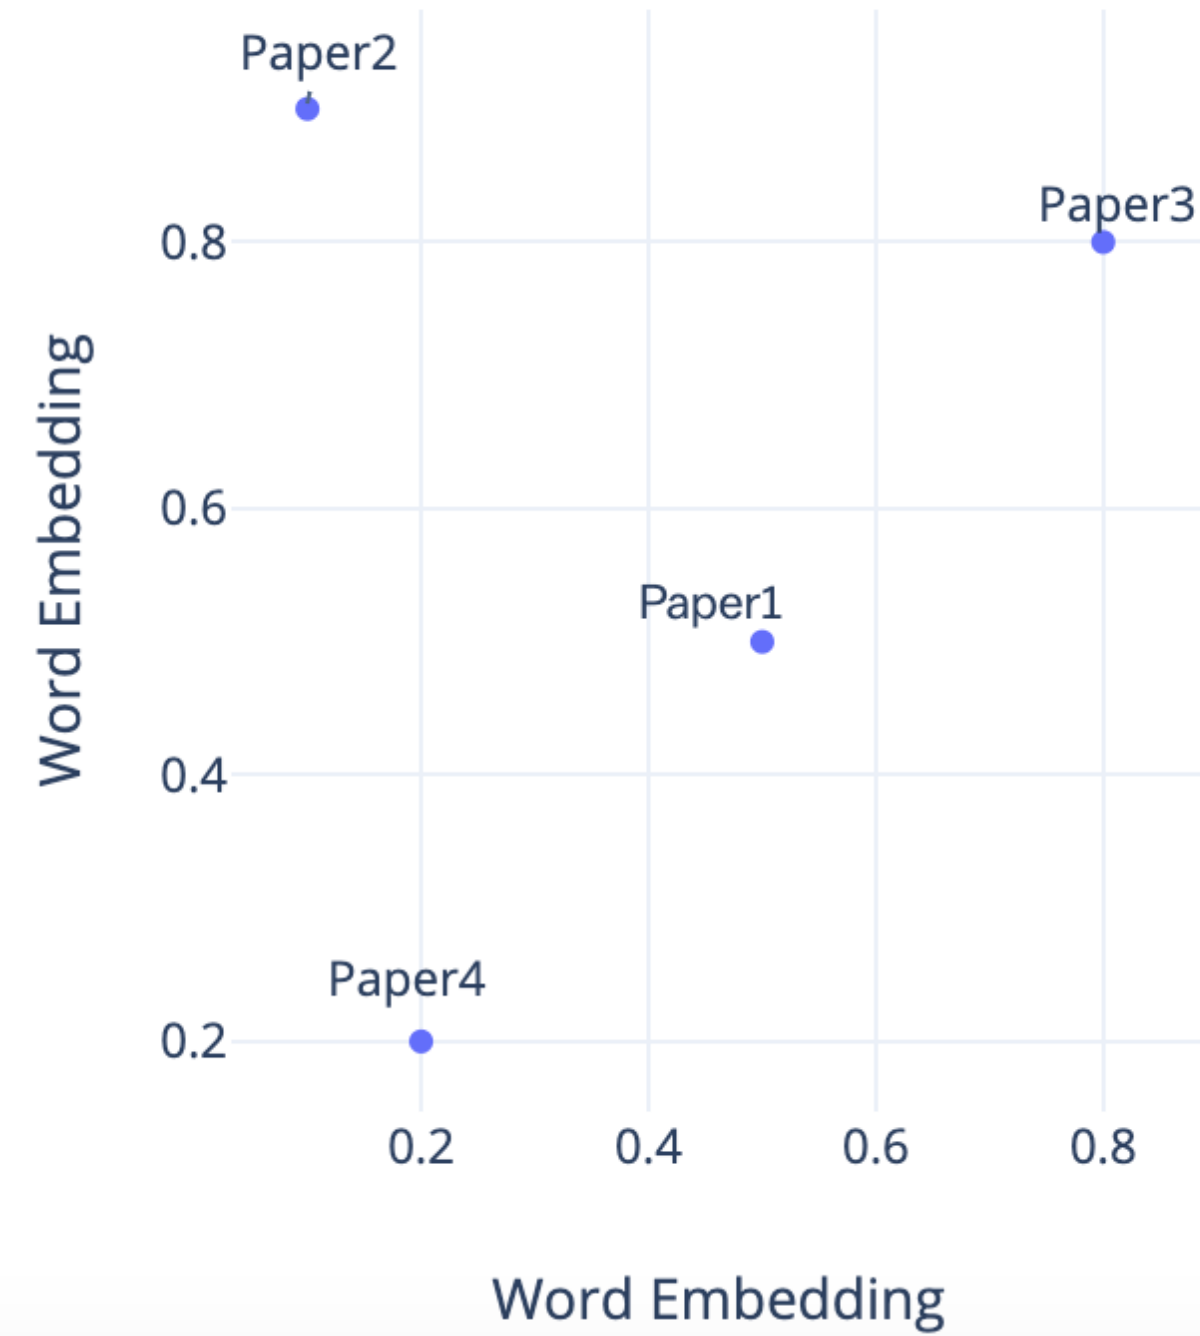

EDA

Top Bi-Grams of the Summary

Word Embeddings Models

- Tf-IDF
- Sentence Transformers
- Specter 2.0 (Bert Based)

System

Select a paper/
Search for a Paper

Paper Details

- Paper1
- Paper2
- Paper 3
- Paper 4
- Paper5

Demo

Conclusion

- Recommendation tool helpful for research.
- Collaborative Filtering based on the user interactions.
- Try multiple new embedding models like ada from OpenAI.

THANK YOU
